OBJECTIVE

An ambitious student pursuing an information technology degree in web and mobile app development and looking for industry experience. Skilled in adapting to changes, working in a team, and using creative solutions to solve problems.

TECHNICAL SKILLS

Programming languages

- Java, HTML, CSS, JavaScript

Frameworks

- React, Nodejs, Express

Operating systems

- Windows

Multimedia

- Audacity, Figma

WORK EXPERIENCE

EZiD

(Jan 2023 – Feb 2023)

Intern Software Engineer

Worked as an intern at EZiD to make a subscription-based payment model and work on the front-end design while also fixing bugs in the current website.

- Worked on the front-end design of EZiD's developer portal.
- Integrated a fully custom subscription payment model using Stripe's Integration, Paymentintent, and Subscription APIs.
- Collaborated with team members.
- Learned more about code management and Git.
- Bug fixes on the website
- Using Jira and learning about time estimations

PROJECTS

Minecraft-like project

Independent Full-Stack developer

- Used polymorphism.
- applied different design patterns to structure classes.
- Created a grid with different cells.
- Made use of different libraries offered by Java.
- Showcased the ability of world generation.

Games

Independent Full-Stack developer

- Created multiple games using JavaScript/HTML/CSS.
- Demonstrated abilities in using different JavaScript functions.

EDUCATION

Macquarie University

Expected graduation by June 2023

Bachelor of Science in Information Technology (Hons)

Major: Web and Mobile App Development

University of Wollongong in Dubai

(Sept 2019 – Sept 2020)

Bachelor of Computer Science (Completed 66 credits)
